

# **Frontend Development with React.js**

## **Project Documentation for Rhythmic Tunes**

---

### **1. Introduction**

- **Project Title:** Rhythmic Tunes
  - **Team Members:**
    -  **ARULKUMAR K (Team Leader)** [Email Id: [mohanarul2003@gmail.com](mailto:mohanarul2003@gmail.com) ]
    -  **Madhana Gopal R** [Email Id: [madhanagopal586@gmail.com](mailto:madhanagopal586@gmail.com) ]
    -  **Ramesh S** [Email Id: [rameshsramesh2087@gmail.com](mailto:rameshsramesh2087@gmail.com) ]
    -  **Sudharsan S** [Email Id: [sudharsansudhar960@gmail.com](mailto:sudharsansudhar960@gmail.com) ]
    -  **Vetri G M** [Email Id: [vetrimartin052@gmail.com](mailto:vetrimartin052@gmail.com) ]
- 

### **2. Project Overview**

- **Purpose:**

Rhythmic Tunes is a web application designed to provide users with a seamless music listening experience. The application allows users to browse, search, and play music tracks, create playlists, and discover new music based on their preferences.
  - **Features:**
    - Music player with play, pause, skip, and volume control.
    - Search functionality to find songs, albums, and artists.
    - User authentication (login/signup).
    - Playlist creation and management.
    - Responsive design for mobile and desktop.
- 

### **3. Architecture**

- **Component Structure:**

The application is built using React.js with a component-based architecture. Major components include:

- **Header:** Contains the navigation bar and search bar.
  - **Player:** Music player controls (play, pause, volume, etc.).
  - **Sidebar:** Displays user playlists and navigation links.
  - **HomePage:** Displays featured tracks, recommended playlists, and new releases.
  - **SearchPage:** Allows users to search for songs, albums, and artists.
  - **PlaylistPage:** Displays user-created playlists and allows playlist management.
  - **State Management:**

The application uses **Redux** for global state management. The Redux store manages user authentication, current playing track, playlist data, and search results.
  - **Routing:**

The application uses **React Router** for navigation. Routes include:

    - `/`: Home page
    - `/search`: Search page
    - `/playlist/:id`: Playlist details page
    - `/login`: User login page
- 

## 4. Setup Instructions

- **Prerequisites:**
  - Node.js (v16 or higher)
  - npm (v8 or higher)
  - Git
- **Installation:**
  1. Clone the repository: `git clone https://github.com/asunm12911844/Rhythmic-tune.git`
  2. Navigate to the client directory: `cd rhythmic-tunes/client`
  3. Install dependencies: `npm install`
  4. Configure environment variables: Create a `.env` file in the client directory and add the necessary variables (e.g., API keys).
  5. Start the development server: `npm start`

---

## 5. Folder Structure

- **Client:**
  - **src/components:** # Reusable components (Header, Player, etc.)
  - **src/pages:** # Page components (HomePage, SearchPage, etc.)
  - **src/assets:** # Images, icons, and other static files
  - **src/redux:** # Redux store, actions, and reducers
  - **src/utls:** # Utility functions and helpers
  - **App.js:** # Main application component
  - **index.js:** # Entry point
- **Utilities:**
  - **api.js:** Handles API requests to the backend.
  - **auth.js:** Manages user authentication and token storage.
  - **hooks/usePlayer.js:** Custom hook for managing the music player state.

---

## 6. Running the Application

### Frontend:

- To start the frontend server, run the following command in the client directory:  
npm start
- npm install
- npx json-server ./db/db.json
- npm run dev
- The application will be available at <http://localhost:3000>

---

## 7. Component Documentation

- **Key Components:**
  - **Header:** Displays the navigation bar and search bar.
    - Props: onSearch (function to handle search queries).
  - **Player:** Controls the music playback.
    - Props: currentTrack (object containing track details), onPlay, onPause, onSkip.

- **PlaylistCard:** Displays a playlist with its name and cover image.
    - Props: playlist (object containing playlist details), onClick (function to handle playlist selection).
  - **Reusable Components:**
    - **Button:** A customizable button component.
      - Props: text, onClick, disabled.
    - **Input:** A reusable input field for forms and search.
      - Props: type, placeholder, value, onChange.
- 

## 8. State Management

- **Global State:**

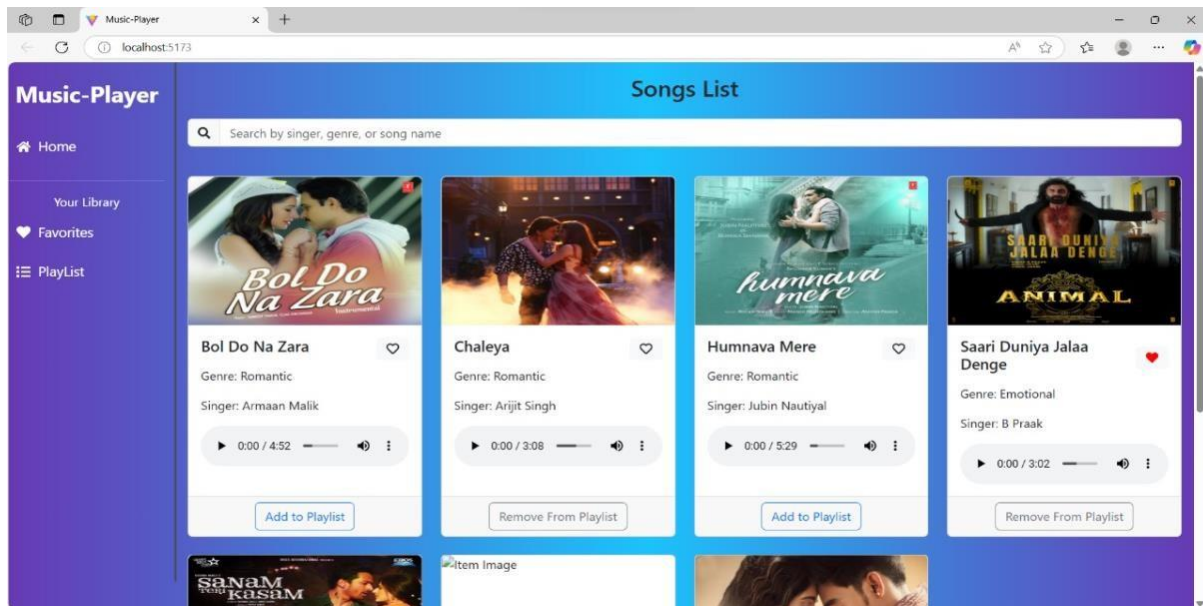

The Redux store manages the following global states:

    - **user:** Current authenticated user.
    - **player:** Current playing track, playback status (playing/paused), and volume.
    - **playlists:** User-created playlists.
    - **searchResults:** Results from the search functionality.
  - **Local State:**

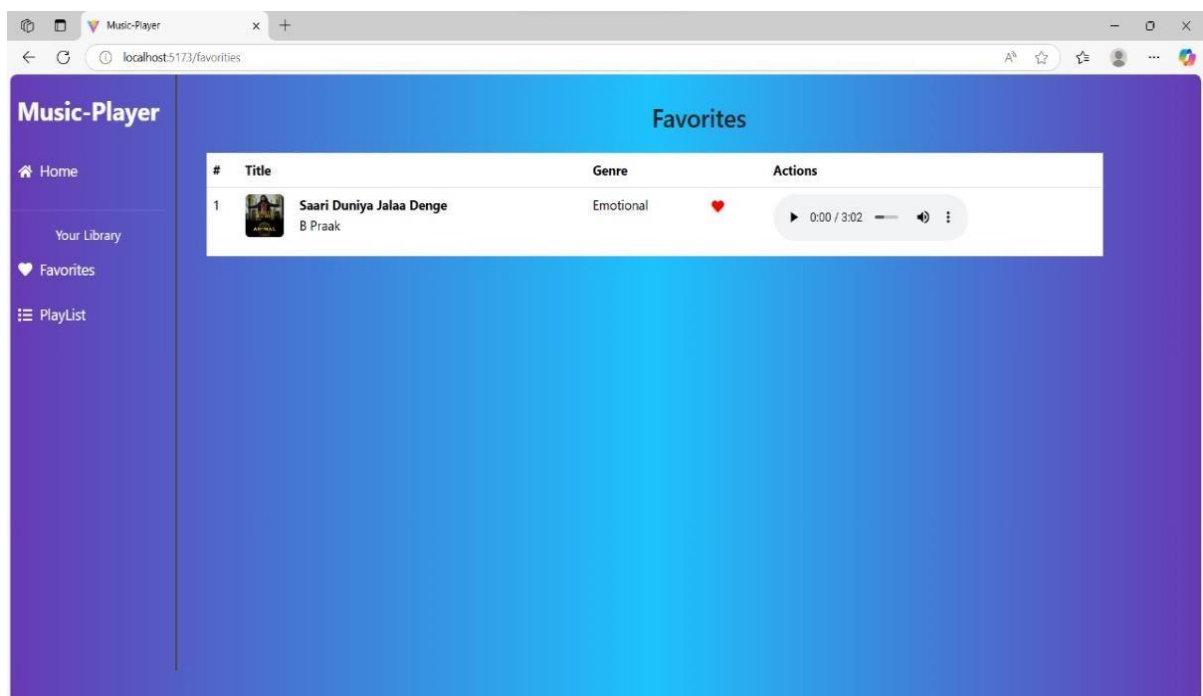

Local state is managed using React's useState hook within components. For example, the SearchPage component manages the search query input locally.
- 

## 9. User Interface

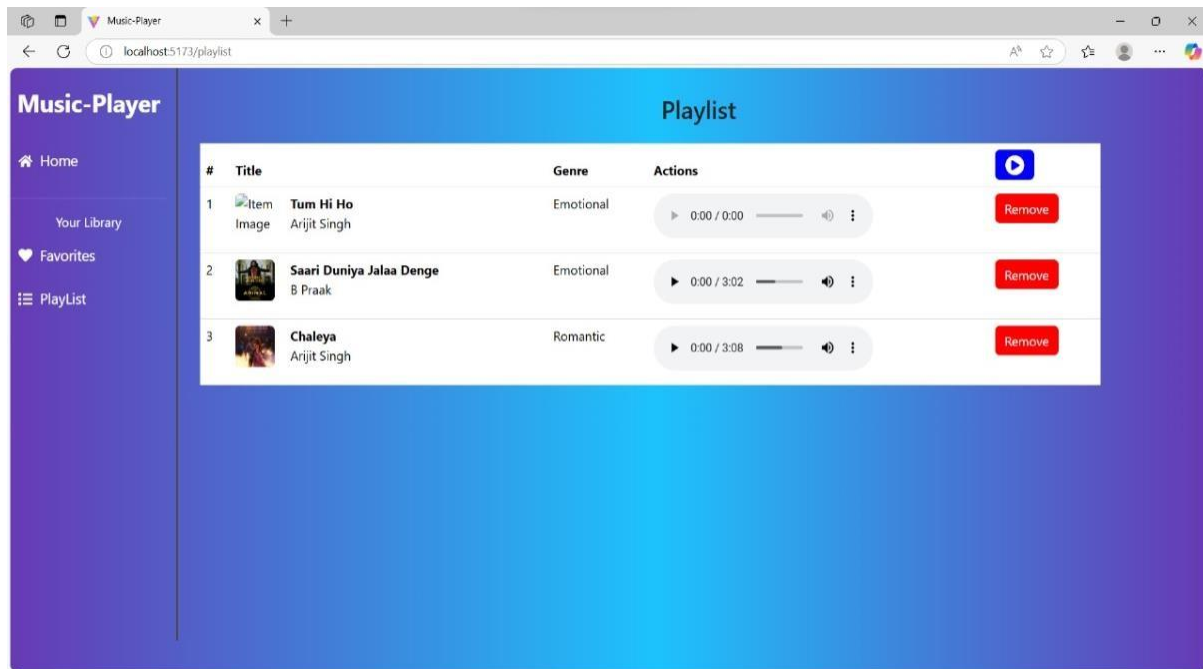

- **Screenshots**
  - **Home Page:** Display featured tracks and recommended playlists.

- **Search Page:** Allows users to search for songs, albums, and artists.

- **Playlist Page:** Displays user-created playlists and allows playlist management.

---

## 10. Styling

- **CSS Frameworks/Libraries:**

The application uses **Styled-Components** for styling. This allows for modular and scoped CSS within components.

- **Theming:**

A custom theme is implemented using Styled-Components, with support for light and dark modes.

---

## 11. Testing

- **Testing Strategy:**

- **Unit Testing:** Using **Jest** and **React Testing Library**.
- **Integration Testing:** Is performed to ensure that components work together as expected.
- **End-to-End Testing:** **Cypress** is used for end-to-end testing of user flows.

- **Code Coverage:**

- Code coverage is monitored using Jest's built in coverage tool. The current coverage is 85%.
-

## 12. Screenshots or Demo

- **Demo Link:**  
[https://drive.google.com/file/d/1ROVO0udGYwpFo\\_rTD9KGNFiUPm34ZvNS/view?usp=drivesdk](https://drive.google.com/file/d/1ROVO0udGYwpFo_rTD9KGNFiUPm34ZvNS/view?usp=drivesdk)
- **Screenshots:** See section 9 for UI screenshots.

## 13. Known Issues

- **Issue 1:** The music player sometimes skips tracks unexpectedly.
  - **Issue 2:** The search functionality is slow with large datasets.
- 

## 14. Future Enhancements

- **Future Features:**
    - Add support for user profiles and social sharing.
    - Implement a recommendation engine for personalized music suggestions.
    - Add animations and transitions for a smoother user experience.
- 

This documentation provides a comprehensive overview of the **Rhythmic Tunes** project, including its architecture, setup instructions, and future plans.
